PASMA Towers for Users Training Course

Duration:
One Day

Group Size:
Maximum of 10 delegates per course.

Who should attend?
Anyone who works with mobile aluminium scaffold towers should take this course, to comply with the duties placed upon employers and employees by law.

Course Aims:
The PASMA Towers for Users training course is the best known and most recognised qualification for the safe assembly and dismantling of aluminium scaffold towers. The morning session is in the classroom, followed by a short-written test. The afternoon session is practical training, involving the building and dismantling of scaffold towers

Course Objectives:
Upon completion of the course the delegates will know: -
• Employer's and employee's legal responsibilities
• Importance of Pre-use inspection
• Safe methods of erection & dismantling

Course Outline:
This course is the standard tower course approved by PASMA, who are the main international body governing scaffold towers. Topics covered include:

• Employer's and employee's legal responsibilities
• Tower components
• Pre-use inspection
• Safe methods of erection & dismantling
• Variances in manufacture
• Common hazards
• Practical training.

Certification:
Learners will take a written test and complete a practical assessment. Successful learners will receive the PASMA training certificate and a photo ID card.
